

## WEB101 Prework

 Student Name: Guy Finkelstein

 Email: finkelsteing2024@fau.edu

## Submission Checklist

👉 Check off each of the features you have completed. **You will only be graded on the features you check off.**

- ☒ ~~Question #1 answered below (all 3 subquestions with minimum word count)~~
- ☒ ~~Question #2 answered below (all 3 subquestions with minimum word count)~~
- ☒ Wireframe

## Individual Brainstorm

? **Question #1:** Describe your website subject in detail:

What do you already know about your social impact topic? (50+ words)

Mental health is an important part of overall well-being, affecting how we think, feel, and act. Many people face challenges with mental health, but there is still a lot of stigma around it. Raising awareness, providing support, and offering resources can help individuals manage mental health better and create a more understanding society.

What do you still need to find out about your social impact topic in order to create a meaningful website? (20+ words)

I need to learn about the most effective resources for mental health support, how to reduce stigma, and ways to engage users effectively.

Who are the stakeholders involved with/affected by your social impact topic? ie children, people living in cities, politicians, CEOs, female-identifying persons (20+ words)

Stakeholders include individuals with mental health challenges, healthcare professionals, families, educators, community organizations, policymakers, and the general public, especially those affected by stigma.

**? Question #2:** Describe your proposed website in detail:

What is the purpose of your website? (30+ words)

The purpose of my website is to share information about mental health, help people find support, and reduce stigmas. It aims to educate and encourage kindness and understanding.

Who is your intended user? (30+ words)

The intended users are people who want to learn about mental health, those who need support, and anyone who wants to help others or spread awareness.

How will your user interact with your website? (30+ words)

Users will interact with the website by reading articles, exploring mental health resources, watching videos, and accessing support options. They can also share their own stories or find tips on how to help themselves or others.

---

## Wireframe

### Homepage

- Brief introduction to mental health.
- Featured section with available resources.
- Call to action to explore support options or share personal stories.

### About Mental Health

- Information on mental health, common challenges, and the importance of seeking help.
- Statistics and facts to emphasize the need for awareness. Support Resources
- Resources for self-care, coping strategies, and mental wellness tools. Personal Stories

- Space for people to share their experiences with mental health, fostering empathy and connection.

### Reducing Stigma

- Articles and campaigns that focus on reducing stigma.

### Get Involved

- Volunteer opportunities, events, and ways to help others facing mental health challenges.

### Contact & Support

- Easy access to contact information for professional help or further inquiries.

? When creating your wireframe, ask yourself:

- What about your topic do you want shared on your website?
- How do you want your content and website structured?

? Copy/Paste a screenshot of your wireframe or a link to it below (if using a link, make sure it is publicly viewable).
